- **Database management system**

Built a data collation system with **two** interfaces

- A registration site that allows users register their data to the database
- An admin site where the admin can access securely the data which has been inputted to the database..and can also perform CRUD operations on the database

Technologies used:

- React Js
- Vanilla css
- Firebase db
- Jsx

Here is the link to the user site

[Funshyaj.github.io/registration-db](https://funshyaj.github.io/registration-db)

- **Discord clone**

Built discord home landing page clone

Frok scratch with react and tailwind css

Here is the link

[Funshyaj.github.io/discord-clone](https://funshyaj.github.io/discord-clone)

- **Budget app**

Built a budget that calates your budget in seconds and helps you make better decisions for analysis..
